

## PRODUCT GUIDANCE SHEET

### SUPER WAX RINSE AID CONCENTRATE

#### OVERVIEW:

Specially formulated to radically reduce the time and effort required to dry your vehicle, leaving a glossy, streak-free finish with no water marks. Highly concentrated and extremely economical in use.

Super Wax rinse aid is applied during the rinse phase of a routine wash and when sprayed over your vehicle the water residue will form into beads and run off rapidly, the vehicle can then be quickly and easily dried to give a high gloss finish.

The water repellent layer can last several weeks depending upon conditions, preventing dirt and grime adhering to your vehicle and keeping it looking cleaner for longer.

#### APPLICATIONS:

Suitable for all types of vehicle including caravans and motorhomes. Safe for use on painted metals, plastics, polycarbonates, glass and rubber. The diluted working solution should be applied to cool, clean, wet surfaces at the end of your usual hand washing process. Can be applied using a pressure washer with chemical dosing system or using a hand sprayer.

#### DIRECTIONS FOR USE:

##### For use with a Pressure Washer:

Dose into the rinse water at 1-5% and rinse the vehicle from the top down.  
Dry normally using a flexi blade, chamois leather or microfibre cloth.

##### For manual application:

Dilute 1 part product to up to 100 parts water and spray evenly onto wet vehicle after rinsing.

Dry normally using a flexi blade, chamois leather or microfibre cloth.

For best results do not apply in direct sunlight.

#### HEALTH & SAFETY:

In compliance with EC regulation No. 1272/2008 and its amendments, this mixture does not present a physical hazard.

**See MSDS for further information.**
